ABOUT ME

I used to be a graphic designer and thought I had found my path — until I tried programming. It completely captivated me. I successfully completed the “**Développeur Web et Web Mobile**” training program at AFPA. Now I’m looking for an apprenticeship to continue my studies in the CDA program. I’m especially drawn to back-end development, with a strong interest in exploring how things work under the hood. The languages that interest me most are Java/Kotlin and Python.

EDUCATION

2000 – Saint Petersburg State University, Faculty of Biology (Saint Petersburg, Russia)

2011 – Bauman Moscow State Technical University (Moscow, Russia)
